

Eligible for NHS treatment

Teeth protrude (overjet) more than 6mm

Reverse overjet greater than 1mm

(Initial contact)

(Intercuspal position)

Anterior or posterior crossbite with mandibular displacement on closure

Impacted teeth

Submerged teeth

Severe crowding with at least one contact point displacement greater than 4mm

Hypodontia (missing teeth)

Anterior or lateral open bites greater than 4mm

Increased overbite with evidence of gingival or palatal trauma

Not eligible for NHS treatment
(In the absence of more severe feature or significant aesthetic impairment)

Teeth protrude (overjet) less than 6mm

Reverse overjet less than 1mm and no anterior displacement

Anterior or posterior crossbite without mandibular displacement

Spacing between teeth

Mild crowding with no significant contact point displacements

Mild crowding

Mild anterior or lateral open bites

Increased overbite but without gingival or palatal trauma
